**Attachments:** NJ CIPFECA Water Manuscript\_Clean\_sg comments.docx; NJ CIPFECA Water SI\_Clean\_sg comments.docx

Hi, James,

I reviewed the paper and the SI and gave you the best comments that I could at this time. As I said in the comments, I feel a little limited without my GIS and other data.

I hope my comments help. Thank you so much for putting this together. It is great to see such progress.

Please let me know if you have any questions or need anything else.

Thanks, again!

**Subject:** [EXTERNAL] NJ Water Manuscript for Co-Author Review

Hello Everyone,

While Jon already did most of the heavy lifting regarding the soil work and source characterization for our friendly, neighborhood emerging contaminant I would be remiss to not also discuss the work we did with water. Since at least some of the water reports have gone back to NJDEP I figured it was time to reveal the scientific manuscript.

Find attached a short letters manuscript detailing the non-targeted analysis results from both the initial water sampling (which I somehow think we still haven't returned an official report on?) as well as the POET sampling follow-up.

If everyone could provide me with their feedback and other comments by the end of next week (May 15) I would be appreciative. I have started dealing with EPA internal review, but would like all the co-author comments before submitting a clean copy for advanced notification.

Thank you.
